PROFILE

Motivated and dedicated a web developer with a strong foundation in programming principles. Skilled in MERN stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3, TailwindCSS, and Figma. Passionate about building efficient, scalable web applications with a focus on user experience. Strong problem-solving and collaboration skills, eager to contribute to dynamic software development projects

PROJECTS

Project-1 Synonym & Antonym Challenge Speed Game

- Description:** A timed game where players quickly match words with their correct synonyms.
- Enhances language skills by testing and expanding knowledge of word meanings.
- Clean, user-friendly interface designed for quick learning and fun competition.

Project-2 Quick Prep Hub

- Built and deployed a web application using the MERN stack, enabling efficient management of educational resources like e-books, cheat sheets, and interview questions. Designed for seamless use by students and teachers.
- Designed secure JWT authentication for personalized access and developed an efficient content upload system, allowing admins to manage and categorize educational materials
